

Q-SYS Networked Systems Technical Notes

Q-SYS Core Processors

Sending Q-SYS messages to SMS via e-mail

Q-SYS has long had the capability to send alerts via email. These alerts can also be sent as SMS messages to mobile phones by sending the email message to a particular address. Many mobile phone carriers have an email format for doing this, and it usually consists of the subscriber's 10-digit mobile phone number and the carrier's domain name. Use the table below to look up the address format for your carrier. They are listed alphabetically.
